

## Accelerating Possibilities

*About Pro-Dex, Inc.*

Headquartered in California, USA, with operations in Oregon and Nevada, Pro-Dex delivers products that are often customized to fit the demanding applications of our customers. [www.Pro-Dex.com](http://www.Pro-Dex.com)

### Our Four Focus Areas Include:

#### *Powered Surgical Devices*

Pro-Dex's unique and specialized experience in designing and delivering reliable, powered surgical devices that withstand harsh environments, enables our customers to provide complete medical device systems.

Pro-Dex is your resource for manufacturing capacity overloads, powered surgical device expertise, and for compressing your time to market, enabling your focus to remain on your core business.

Corporate Headquarters: Powered Surgical Devices and  
Medical Device Manufacturing Services  
2361 McGaw Avenue, Irvine, CA 92614 USA  
(800) 562-6204 • (949) 769-3281 Fax • [www.Pro-Dex.com](http://www.Pro-Dex.com)

#### *Medical Device Manufacturing Services*

Pro-Dex's ISO 13485-certified facility gets electro-mechanical devices planned, built and on the shelf quickly with outsourcing excellence. Customers rely on our proven RA/QA expertise, streamlined documentation and release processes, and lean manufacturing to get their products to market.

Our precision machining capability and high-mix manufacturing flexibility can produce your components to full systems, and everything in between. Our trusted team ensures high quality, reliable and regulatory compliant products delivered on time.

#### *Custom Motors for Harsh Environments*

Pro-Dex Carson City produces reliable, custom, fractional-horsepower motors for customer's products that operate in harsh or challenging environments in medical and aerospace applications. Our unsurpassed technical support and customer service assists each customer with solutions for their unique requirements.

#### *High Performance Multi-Axis Motion Control*

Pro-Dex OMS provides rock-solid multi-axis motion control with the right combination of standard and customer specified features for general motion application as well as critical applications where failure is not an option. Our customers' count on us when their success depends upon consistent, reliable performance in demanding applications such as Lab Automation, Medical Equipment, Semiconductor Equipment and specialized needs in Research Facilities around the world.

## Accelerate Your Products to Market

### *Accelerate Your Speed To Market*

Pro-Dex® enables speed to market through a holistic, integrated approach to all projects. Over the years, we have invested millions of dollars, representing years of experience, in the research and development of motorized devices for the medical industry. This strong foundation allows Pro-Dex to provide its customers with development predictability and product reliability unmatched in the industry. The collective intelligence offered by Pro-Dex accelerates the design process and helps to ensure the development of clinically efficacious and commercially successful products.

### *Provider To Leaders In The Medical Device Industry*

Pro-Dex products are found in hospitals, dental offices, medical engineering labs, scientific research facilities and high-tech manufacturing operations around the world. Our customers include some of the world's largest medical and dental device companies, as well as leading aerospace companies. You won't find the Pro-Dex name on the outside of any of these products, but clinicians around the world have grown to rely on the Pro-Dex quality found inside.

## Imagine No Limits

### *Creating Value Through Improved Efficiencies*

The philosophy behind Pro-Dex's success is based on creating and providing value at every level of the organization. Creating strong partnerships and improving development and manufacturing efficiencies has allowed Pro-Dex to deliver where others have failed. Every step of the product development cycle is driven to accelerate and perfect the process. Many medical device companies struggle with designing products to survive the demands of repeated use, particularly the damaging effects of sterilization. Our design engineers have studied and perfected a myriad of ways to lower failure rates and this wealth of knowledge is passed on to our customers who benefit from our past experience.

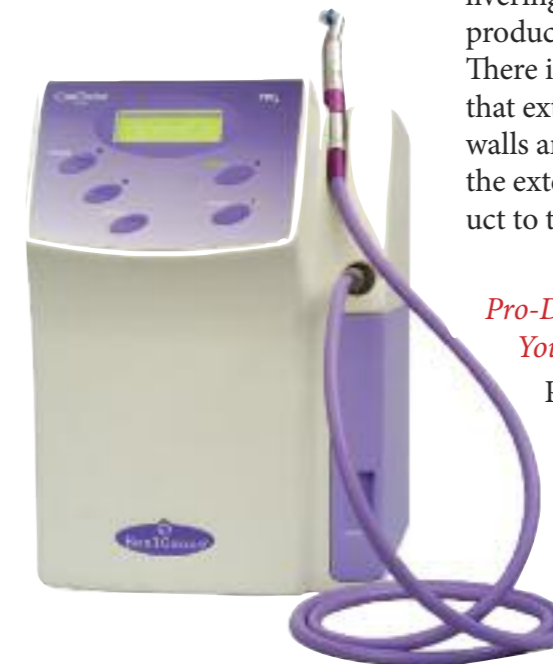

## Transform Your Vision Into Reality

### *ISO 13485:2003 Certified Facility*

Our commitment to regulatory and compliance standards ensures that our products stand up to the stringent requirements found in the medical device arena.

### *Quality Is In Our DNA*

Beyond regulatory compliance, quality is the backbone of our organizational DNA. From engineering, to customer service, to packaging and assembly, every Pro-Dex associate is committed to delivering the highest quality product on-time, every time. There is a pride of ownership that extends far beyond our walls and is represented in the extended life of the product to the end user.

### *Pro-Dex Innovates To Make Your Vision Reality*

Pro-Dex acts as an extension of your team, to help accelerate the future and transform your vision into reality.
